

WATER RESCUE

THROW LINE is a floating rope that will not absorb water. It is constructed with a twisted multi-filament polypropylene (MFP) UV stabilized cover and a parallel strand MFP core. It features an extra heavy cover ratio for improved durability, light weight, and throw accuracy.

SAFETY LINE is a double braided floating rope featuring an abrasion-resistant four ply (MFP) UV stabilized cover over a nylon core. Standard colors are high visibility yellow with a red fleck. An optional Night Bright reflective tracer can be added for improved low light visibility. For maximum visibility specify our Night Bright Xtra 2 fleck in yellow, orange or lime green safety colors.

NOVALITE HP is a double braided floating rope constructed with a twisted multi-filament polypropylene (MFP) cover and a blend of Spectra and MFP in the urethane coated core. Novalite HP is an extremely strong, durable, light weight, and highly visible line. It has excellent handling characteristics and is fully splicable.

WATER RESCUE SPECS				
	Diameter	Metric	Average Tensile Strength	
Throw Line	5/16"	8mm	1700 lbs	771 kg
	3/8"	10mm	2300	1043
Safety Line	5/16"	8mm	3500 lbs	1588 kg
	3/8"	10mm	4500	2041
Novalite HP	5/16"	8mm	3650 lbs	1656 kg
	3/8"	10mm	5000	2268

All Novabraid water rescue lines are available in a variety of put ups including 600ft wooden reels, 1200ft bulk box, cut lengths, mesh bags and throw bags. Optional Night Bright reflective tracers are available on all water rescue constructions up to 1/2 inch diameter.
