

POLYLON

POLYLON is a double braided rope constructed with a 100% polyester cover and a 100% nylon core. This rope was specifically designed for electric utilities but has a number of industrial and marine applications. The construction provides extremely high strength, very high energy absorption, and very good dielectric properties. A single blue/gold tracer in the cover identifies Polylon. Diameters over 1 inch will be solid white with no blue and gold tracers. Urethane coatings are available to maximize abrasion resistance and minimize water absorption.

Features:

- Specific Gravity of 1.24
- High Energy Absorption
- Extremely High Strength
- Good Dielectric Properties
- Urethane Coated Cover Available

Suggested Uses:

- Rigging Lines
- Pulling Lines
- Lift Lines
